Proved to consistently deliver exceptional results and on-time task completions. Involved excellent communication skills, troubleshooting, and working with peers.

PROJECTS

Vive Tracker Battery Bank

[GitHub](#)

A CAD/Electronics Project. A battery bank that charges an HTC Vive Tracker through pogo pins with the goal of being easy to fabricate.

Portable Attendance System

[GitHub](#)

An Attendance System written in Java that can be easily deployed on any system. Scans QR codes and logs the corresponding member's attendance to a generated .csv.
